

Driver File Flowchart

```

graph TD
    A[Draw method called.  
Calls update method.] --> B[Update method saves  
current frame, runs  
binary HSB filter on the  
frame.]
    B --> C[Iterate through the  
filtered frame and add  
white(object) pixels to the  
arraylist. Was it  
successful?]
    C -- No --> D[ Finds the center of the  
object from its pixels.  
(Feed this point into  
Tracer]
    C --> E[Iterate through the object  
pixels in Object contained  
and turns their locations  
on the screen to red]

```
